Professional Summary

Python Backend Developer with experience in Python, backend application development, MySQL, REST API development, web scraping, and data extraction. Experienced in developing database-driven applications, creating and managing APIs, performing database operations, integrating systems, and automating data collection. Hands-on experience building Bank Management, Hospital Management, and Inventory Management Systems. Strong understanding of backend development, SQL, database management, API integration, Git, and problem-solving.

Technical Skills

- **Programming:**

  Python | SQL | JavaScript | HTML | CSS

- **Frameworks and Libraries:**

  Welcome to Python

  FastAPI | Bootstrap

- **Backend Development:**

  REST API Development | API Development | Create, Read, Update, Delete Operations | JWT Authentication | API Integration

- **Database:**

  MySQL | Database Design | SQL Queries | Database Management

- **Data and Automation:**

  Web Scraping | Data Extraction | Data Processing | Automation

- **Developer Tools:**

  Git | GitHub | Postman

- **Core Concepts:**

  Object-Oriented Programming | Responsive Web Design | Software Development

Projects

Bank Management System | Python, MySQL

- Developed a banking application for managing **customer accounts, transactions, balance inquiries, and account history**.
- Implemented **CRUD operations using Python and MySQL** for efficient database management.

- Designed a command-line interface (CLI) for account creation, transaction processing, and customer account management.

Hospital Management System | Python, MySQL, Bootstrap

- Developed a hospital management system for managing **patient records, doctor appointments, and billing information**.

- Designed a relational **MySQL database schema** for patients, doctors, appointments, and billing operations.
- Developed responsive administrative and staff interfaces using **Bootstrap** to improve usability.

Inventory Management System | Python**,** FastAPI**,** MySQL

- Developed a **RESTful API using FastAPI** for inventory management, including product creation, updating, deletion, and search operations.
- Integrated **MySQL** for efficient product data storage, retrieval, and inventory tracking.
- Implemented **low-stock alert functionality** to support timely inventory monitoring and replenishment.

Experience

Python Developer

Tech Rush Global | Muzaffarnagar, Uttar Pradesh

March 2026 – Present

- Developed backend applications and database-driven solutions using **Python, FastAPI, MySQL, HTML, JavaScript, and Bootstrap.**
- Developed and maintained **Bank Management and Hospital Management Systems** with CRUD operations and database integration.
- Designed and integrated **REST API development** for efficient communication between application components and database systems.
- Implemented **MySQL database design, SQL queries, data management, and application integration** for backend applications.
- Performed **Web scraping and data extraction** to collect, process, and organize structured data.
- Used **Git and GitHub for version control**, code management, and collaborative development.
- Worked on **API integration, backend development, database management, debugging, and application improvement.**

Education

Bachelor of Technology (B.Tech) - Computer Science 2023 – current
Dr. A.P.J. Abdul Kalam Technical University, Lucknow, Uttar Pradesh

Class 12th – [Science Stream - PCM] 2023
YOGI MANGALNATH S.V.M.T.C., Roorkee, Haridwar, Uttarakhand

Class 10th 2021
V K M H S S, Nawla, Muzaffarnagar, Uttar Pradesh
